Among the industries it actively serves are manufacturing, construction, healthcare, agriculture, commercial refrigeration and solar energy. Established in 1996 and headquartered in Kuala Lumpur, it has 15 branches nationwide. For details, please visit www.paclease.com.my

How Dr Kenneth Lee got equipment financing in a day to fulfil his aesthetics clinic dreams

It was the last quarter of 2024 and, after more than a decade working as an aesthetics doctor in hospitals, Dr Kenneth Lee was ready to embark on a brand-new adventure of service to the community. It was to open his own aesthetics clinic to meet the ever-growing demand for dependable services in Johor Bahru.

Fast forward to 2026 and Dr Lee's premium aesthetics clinic is thriving with an enviable clientele in Taman Eco Botanic, a rapidly developing township with almost full occupancy across medium- to high-end residential properties and commercial shop lots. He recounts the journey that saw him getting the equipment financing he needed within a day!

"I remember vividly the day I met Eng Kok Weng from Pac Lease. Honestly, I still cannot believe how quickly things unfolded that day. Kok Weng told me that if I could get a few standard forms filled and minimal documentation over to him, he could arrange the financing within a single business day. A single business day? That sounded crazy! But, yes, I needed to get the financing fast to take full advantage of the opportunities. I told myself I would not believe it until it happened as I was all too familiar with the hassles traditionally associated with the usual approaches to financing," Dr Lee recalls.

Specifically, he needed a new Fotona laser system for his aesthetics clinic. That meant potential financing of up to a whopping RM450,000!

True to his word, Kok Weng delivered the good news of the financing being approved within a day after receiving the completed documentation. And the good doctor was set to roll out his plan.

Today, Dr Lee's premium aesthetics clinic is growing from strength to strength, thanks in no small measure to the fast, flexible and future-focused medical equipment financing he managed to obtain when he needed it most.

He sums it up. "As a doctor, time matters. The Pac Lease team was responsive and efficient, and they made the entire application process effortless. The fast approval helped me move ahead with my clinic plans confidently. This is the difference between a mere financier and a true partner that is going to stick with you for the long haul."
