REFRESHER

Emergency Response Protocol Matrix (Simplified Version)

Category	Relation to each category	What you need to do	Changes on category upon COVID-19 testing	
A Tier 1	Patient diagnosed as confirmed COVID-19 case	To be admitted to hospital for treatment	To be treated in the hospital.	
B Tier 2	Individual with close contact to individual from Category A	COVID-19 screening test will be conducted. Home Surveillance as advised by MOH.	Category B: +ve	Admitted to hospital
			Category B: -ve	Home surveillance
C Tier 3	Individual with close contact to individual from Category B	Advisable for Home Surveillance until B's testing result is out.	Category B: +ve	Category changed to B
			Category B: -ve	Can continue working
D Tier 4	Individual with close contact to individual from Category C	You can work but need to get update on the status of Category C.	Category B: +ve	Category changed to C
			Category B: -ve	Can continue working
Normal/ Low Risk	No connection with Category A,B,C or D	No restrictions, you can work (Subject to the Movement Control Orders updates)	No connection with the COVID-19 chain.	
Notes:				
i. Staff is required to report the temperature status to HOD / BM / TL twice daily, before 9:00 am and before 3:00 pm. Applicable for Tier 2 and Tier 3.				
ii. Staff is required to adopt "3Ws" and avoid "3Cs" at all times as an added precautionary measure.				
iii. Home surveillance will last for 14 days.				

ILLUSTRATION

Kevin is working in Pac Lease.

Sandra was in close contact with Melissa who was confirmed COVID-19 positive.

Tier 1: Melissa

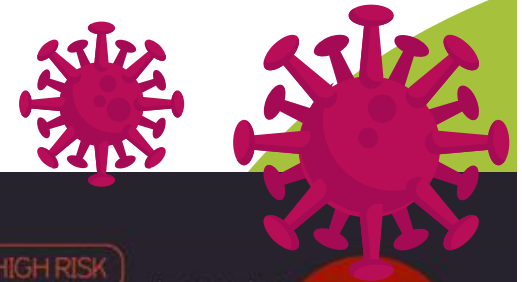

Tier 2: Sandra

Tier 3: Kevin (to observe home surveillance until Sandra's COVID-19 testing result is out.)

(If the result is +VE, Sandra and Kevin will then fall under Tier 1 and Tier 2 respectively.)

INFORMATION

Coronavirus Riskiest Activities

According to 500+ epidemiologists & health professionals

risk factors to consider

- 👤 **people** how many?
- 📏 **space** how close is the contact?
- ⌚ **time** how long the exposure?
- 📍 **location** inside or outside?
- 👉 **surfaces** lots of high touch?
- 📊 **area** high number of cases?
- 📍 **covidcity** how likely is compliance?

LOW RISK

MEDIUM RISK

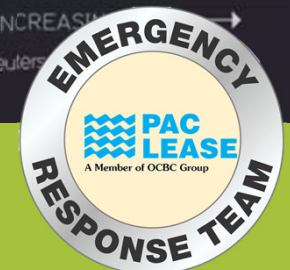

HIGH RISK

Risk reduced by wearing a mask, social distancing & washing hands

INFORMATION

The Availability of COVID-19 Vaccine in Malaysia

1

Will the vaccine will be available in Malaysia soon ah?

2

I heard Malaysia is expected to secure access to COVID-19 vaccine supply in the first quarter of next year.

3

Wow fantastic!
If not mistaken, priority would be given to front liners from the health and security sectors right?

5

Good la, at least can see some light at the end of the tunnel!

4

Yeah, that's right. MOH has been in contact with eight vaccine candidates which are now at the third phase of clinical trial.

11 vaccines are in large-scale efficacy test, out of which 6 have been approved for early or limited use.
