

COVID-19 Alert : 03 October 2021

STATUS COVID-19 & VAKSINASI

3 Okt 2021, 11:59 pm

Jumlah Sembuh

2,100,565

Sembuh Harian

14,454

Kes Baharu

9,066

Kematian

118

Kumulatif Kes

2,277,565

	Remaja (12-17)	Dewasa (18+)
Lengkap divaksinasi	3.5%	87.6%
Sekurang-kurangnya satu dos	55.7%	94.3%
Dos diberikan Harian	101,580	104,994
Dos diberikan Keseluruhan	1,860,660	42,491,419

FASA PELAN PEMULIHAN NEGARA

FASA 1

FASA 4

- NEGERI SEMBILAN
- W.P. LABUAN

Highlights (as at 03 October 2021):

- Malaysia recorded 9,066 new Covid-19 cases on Sunday (Oct 3), bringing the cumulative total to 2,277,565. Sarawak recorded the highest number of cases at 1,418, followed by Selangor (1,000) and Johor (981).

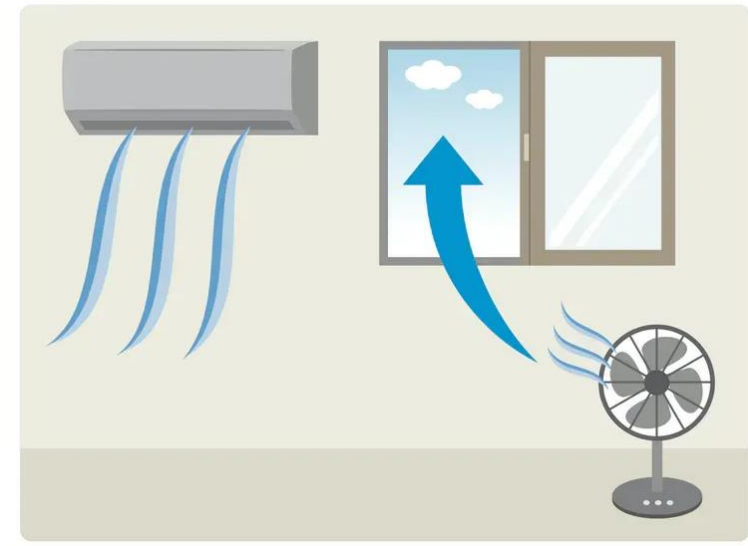

INFO

AIR VENTILATION

- The vast majority of SARS-CoV-2 transmission occurs indoors, most of it from the inhalation of airborne particles that contain the coronavirus. The best way to prevent the virus from spreading in a home or business would be to simply keep infected people away. But this is hard to do when an estimated 40% of cases are asymptomatic and asymptomatic people can still spread the coronavirus to others.
- Masks do a decent job at keeping the virus from spreading into the environment, but if an infected person is inside a building, inevitably some virus will escape into the air.
- Once the virus escapes into the air inside a building, you have two options: bring in fresh air from outside or remove the virus from the air inside the building.
- Keeping windows and doors open is a good start. Putting a box fan in a window blowing out can greatly increase air exchange too.

REMINDER

Walaupun terdapat **kelonggaran sekatan pergerakan** bagi mereka yang telah menerima vaksinasi lengkap, **terus amalkan langkah-langkah pencegahan** berikut untuk mengelakkan penularan jangkitan:

1

Pakai pelitup muka di kawasan orang ramai

2

Pastikan pengudaraan yang baik

3

Elakkan aktiviti berkumpul
